Halloween Lands On A Saturday.

Is Your Store Ready?

5 hidden problems that scare shoppers away

1. **Checkout stalls**
   Button spins, address rejected
2. **Slow pages**
   Shoppers won't wait
3. **Phone experience**
   Tiny taps, covering pop-ups
4. **Payment failures**
   Not the same as declines
5. **Stock errors**
   Wrong orders after payment

1

Checkout Won't Finish

The button spins, no shipping options show, or a valid address is rejected. Test as a guest with three different addresses.

2

Slow Pages Send Shoppers Away

Grey boxes, images popping in, a filter that lags. A shopper with other tabs open will not wait. Check real-visitor data first.

3

A Store That Feels Bad On A Phone

Responsive only means it fits the screen. Buy something on a real phone and see if one thumb can finish the order.

4

Payment Failure Or Normal Decline?

A decline belongs to one card. A technical failure hits many customers at once, often right after a change.

5

Stock And Orders That Disagree

When systems hold different numbers, shoppers buy items you lack. Compare your ten best sellers in every system.
